-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Throughout the specification applicant uses an odd convention in describing various measurements, for example page 3, last line “0,002”; page 4, line 4 “0,26” and line 5, “0,52”; page 9, line 1 “8,5%”. The use of such convention renders the numbers measurements uninterpretable. Appropriate correction is required. No new matter will be entered. The formulas presented on pages 7 and 8 are deficient as the units in the formulas do not correspond. Page 5, line 11 is objected to since it is the specification that is to support the claims and not visa versa.

Claim Rejections –35 USC § 112

Claims 1- 6 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 3 and line 4, it is unclear what is meant by “□m”. In claim 1, line 4, “the space (6,7)” lacks proper antecedent basis. In claims 1 and 2 the units in the formulas don’t correspond. In claim 2, line 1, “the nominal empty volume NVV” lacks proper antecedent basis, it appear that “empty” should be changed to “void” in order to correspond to claim 1 and also to correspond to the acronym “NVV” used. In claim 3, “0,4 mm²/pitch” is not understood as

written. In claim 3, “the free space” lacks proper antecedent basis. In claim 6, lines 2 and 3, “frusto/conical” should be changed to “frusto-conical”, to correspond to format of claim 5, if in fact that is applicant’s intent.

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, as best understood, are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 4,830,411 to Black or U.S. patent 6,581,980 to DeLange et al.. Both patents illustrate threaded connections with dry lubricant on the threads with a thickness appearing to fall within the range prescribed and also including a void area between the threaded connections.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
